

Ladybug Newsletter

October 21, 2011

Look what we have learned about apples:

- *Apples grow on trees.
- *Apples can be different colors: red, yellow or green.
- *Different color apples have different tastes.
- *Apples have seeds.

In art this week the children sponge painted a tree and then added red apples with a cork dipped in red paint.

The children discovered a new math activity this week-patterning apples. (red,green,red,green). We also tasted apples and the children graphed their favorite apple.

The children also finished the creation books and will be bringing them home on Monday. In Jesus Time we talked about what God created on the 4th, 5th, 6th and 7th days.

God's Blessings!!

Mrs. Berg
