What we've learned about pumpkins:

1. Pumpkins have seeds.
2. Pumpkins grow in the ground.
3. Pumpkins can be all different sizes and shapes.
4. Pumpkins grow on a vine.
5. Pumpkins have gooey pulp inside.

The children have done many exciting activities with pumpkins. In art the children painted with small pumpkins. We talked about an artist named Picasso and what an artist does for a living. After discussing this famous artist, the children pretended to be Picasso and paint a beautiful picture using pumpkins.

In math and science the children estimated the circumference of our pumpkin and then measured the pumpkin with a tape measure. The children also described the way the pumpkin feels.

In Jesus Time we read the story of Jesus calming the storm. We then discussed fears we each have and how Jesus can help calm our fears. The children learned that Jesus is always near and when we pray and ask God to help us, He will. God is wonderful!!

God's Blessings!!

Debbie Berg
