

# Ladybug Newsletter

October 7, 2011

Look what we've been learning about:

## Owls

1. Owls are nocturnal. The children learned that nocturnal means owls come out at nighttime.
2. Owls have great night vision. We learned that vision means to see with our eyes.
3. Owls eyes don't move.
4. Most owls live in trees.

In art the children made owl babies from cotton batting. Each of the children described how baby owls feel.

We will continue to talk about owls next week.

In Jesus Time the children are learning about the world God created. They are making a book about God's creation.

NO SCHOOL ON MONDAY.

Have a blessed weekend!!!

Mrs. Berg
